

# Dual study program B.Sc. Wirtschaftsinformatik - FH Wedel

# Small is beautiful, welcome to enfore...

through our hardware and software solution, we aim to help over 200 million companies everyday to stay competitive in a digitalized world. Our vision is simple, the mission is not: to enable every business to enjoy the scale and efficiencies previously reserved for larger companies. Working at enfore is not necessarily something for everyone. Not because we are better or worse, but because we do our best, every day to improve our product and ourselves as a collective. If you are looking to really make a difference and use your skills in a sustainable way, you have come to the right place.

As a dual student (m/f/d), an experienced, ambitious and international team awaits you at enfore. During your training with us, you will get a comprehensive look behind the scenes of an internationally operating software company and help us to constantly expand and improve our software.

#### Your tasks:

- You are supporting our international engineering team and learn the whole repertoire of programming, from front-end to back-end
- You will develop software solutions that help restaurateurs, service providers and retailers to digitalize their business processes in their daily doing
- You learn how cloud-based software is designed and how existing applications are further developed
- Moreover, you learn how to plan software projects efficiently and effectively, managing the implementation in a stringent and results-oriented manner and to measure and control the respective project success

## Your profile:

- You have accomplished your high school diploma or technical college entrance qualification with very good grades
- You would like to be able to apply and use your knowledge practically in addition to the theoretical content
  You are very interested in software development and in dealing with innovative technologies and have a
- Four are very interested in software development and in dealing with innovative technologies and have a strong mathematical and technical understanding
